

29th May 2020

Dear families of Caterpillars and Tadpoles,

We hope you have all had a lovely half term and managed to have a bit of a break from learning. The weather has been fabulous so hopefully you have been able to make use of it and have enjoyed some wonderful family time together.

Welcome back to the start of the second half of the summer term. This half term we will continue to set home learning as well as teach children in school. We will set Hamilton English and Maths activities, Education City tasks and a weekly challenge specific to EYFS that develops the 'characteristics of effective learning' that we encourage in all our children.

This week we will be focusing on 'The Hungry Caterpillar'. We have recorded this story for your children to watch and we shall be sharing it in school. We shall be looking at the life cycle of a caterpillar and at symmetrical patterns. Therefore, our challenge this week is to create a symmetrical butterfly picture. Your child can create this in any way they like – paint, natural materials, construction; it's entirely up to them. Here's a few examples to get them going.

As before, we will continue to look and respond to work posted on ClassList and via email but please bear with us if we take a little longer in getting back to you.

Please take care of yourselves and remember we are thinking of you.

Kind regards

All staff in EYFS.
