

Dear year 6 home learners,

We have so much enjoyed welcoming lots of you back at school this week and hope to see more of you before the summer. It is great to be back!

However, we do understand that some of you are still learning at home and want to keep in touch with you too. Please keep following the White Rose maths and the Hamilton English which is the same as we are following at school.

At school we are looking forward to starting our unit on Japanese Art. We will be looking at The Edo Period of Japanese Art focusing on landscape painters including studying a picture of Mount Fuji and Japanese prints. You could research these areas at home. There is a powerpoint to go with this lesson.

We will be continuing with the RE topic on Buddhism which is on the school website.

In History we will be starting to look in more detail at the Industrial Revolution and in particular some of the important inventions of the time. You might like to watch this clip: <https://www.bbc.com/teach/class-clips-video/history-ks3-gcse-the-industrial-revolution/z4j2hbk>

Our Science learning this week is to recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents. There is a powerpoint you can look through to help you with this

In school we have also been watching Newsround each day and discussing the stories. This is a great way to keep up with current events in the UK and over the world and we recommend it to you all.

We hope you are all safe and well and please remember to stay in touch.

Best Wishes,
Mrs McCann and Miss Dawson
