

Choose at least 5 words that you do not already know how to spell from your list of Common Exception words. If you can already spell these words then choose 5 words of your own e.g. from your reading book, the names of people in your family, animals, colours, days of the week...

Write the words correctly below and then work out their value if you made the word using Scrabble tiles.

Word	Letter values	Total

Why not challenge someone in your family to a spelling game?

Take turns to pick a word and calculate the Scrabble value of your word. Whose word scores the most points? What is the highest score you can make using a 5-letter word?

Maybe you can invent your own spelling game or challenge using the Scrabble tiles.
