

Year 2 Design and build a Bird Bath

Items you can use

First design your bird bath on a sheet of paper, using the materials above.

Next take your resources and follow your plan and build it.
(Don ' t worry if you need to change your plan along the way)

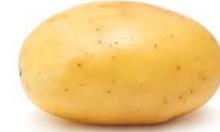

Use this knot to help you fasten your sticks together

Remember your bird bath needs to be free standing and off the ground so it can be moved to a safe place for the birds

Extension—

Can you add somewhere on your structure to put bird food?

Extension activity—

Adult supervision is needed for this activity

You will need a potato.

First wash the potato.

Next Slice the potato into thin slices.

Then ask an adult to help you put the potato slices on a baking tray (with a small amount of oil)

Get an adult to place in a hot oven .

Great job you ' ve just made potato chips!

Good Luck Year 2

I cant wait to receive pictures of your creations.

Remember ,when you get the chance, take a seat under a tree, close your eyes and take deep breaths.

Use your senses to connect with nature!
