

DO SOLIDS DISSOLVE?

Try dissolving the solids you have been given.

What happens?

Use this grid to record your findings.

Name of solid	My observations:		Did the solid dissolve or not?
	after adding water	after stirring	
Which solids dissolved?			
What happened to the solids when they dissolved?			

- 1 What did you notice when you added the water to the solid?
- 2 Were there any changes straight away?
- 3 Did stirring your solid help?
- 4 Which dissolved?
- 5 What happened to those that didn't dissolve?
