## Once Upon a Measure

I can use non-standard units to measure length and height.

The crown is $\qquad$ squares long.

The palace is $\qquad$ squares tall.

|  |  |  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

The dragon is $\qquad$ squares long.

The prince is $\qquad$ squares tall.

The unicorn is $\qquad$ squares long.

The princess is $\qquad$ squares tall.

The wand is $\qquad$ squares long.

The knight is $\qquad$ squares tall.

## Once Upon a Measure

I can use non-standard units to measure length and height.

Choose something to measure with.
Estimate the size of the picture.
Measure it and write down the answer.

| Object | Estimate | Measurement |
| :--- | :--- | :--- |
|  |  |  |
|  |  |  |
|  |  |  |

## Once Upon a Measure

I can use non-standard units to measure length and height.

Choose something to measure with.
Estimate the size of the picture.
Measure it and write down the answer.

| Object | Estimate | Measurement |
| :--- | :--- | :--- |
|  |  |  |
|  |  |  |
|  |  |  |

Choose something else to measure with.
This is what I will use to measure:

| Object | Estimate | Measurement |
| :--- | :--- | :--- |
|  |  |  |
|  |  |  |
|  |  |  |
